

OREGON DATA SUITE

FAQs

How is this different from my Student Information System?

Your student information system displays individual student data. The Oregon Data Suite (ODS) takes the data from your SIS and aggregates it so it can be viewed at a district, building, school, or grade level with many other demographic and course filtering options.

Can I use it for ODE reports?

The Oregon Data Suite can provide both aggregated and individual student level data that can be used for ODE reports. However, in some cases the Oregon Data Suite will not match ODE submissions and reports. The data shown, unlike ODE data, includes current information for all of your students. It is not based on fall or spring membership and does not filter out students based on a short enrollment period.

How will it benefit my teachers?

Teachers can easily view Smarter Balanced, OAKS and ELPA scores, Essential Skills data, attendance, discipline, course performance, and identify students that are At Risk of academic failure. Individual student pages can also be created so teachers can share information with parents. Teacher and student pages are completely customizable to meet your district's needs.

How will it benefit my Administrators?

Administrators will be able to easily view information by district, building, grade, or student with the ability to filter by demographics. They will also be able to identify students At Risk of academic failure.

What if I am using SWIS for discipline?

We can bring SWIS data in for any or all schools within your district. We have several reports and metrics that can incorporate all of your discipline data from SWIS and your student information system.

Where does the information come from?

We import data from your student information system nightly. OAKS, Smarter Balanced, and ELPA scores are uploaded nightly from ODE. When possible, we automate data imports from our third-party vendors. Currently these include easyCBM, DIBELS, i-Ready, STAR, SWIS, DESSA, and NWEA MAPS.

What happens when a new student enters my district or leaves?

When a new student enters your district, the student will appear in the Oregon Data Suite the day after the enrollment date. Once you run your SSID upload, OAKS, Smarter Balanced, and ELPA scores will be available; this process usually takes about 3 days. When a student withdrawal from your district, they will show as an inactive student on the day after the withdrawal date.

We use easyCBM as an assessment, can that be included in the Oregon Data Suite?

We work with several 3rd party vendors including DIBELS, easyCBM, STAR, i-Ready, DESSA and NWEA MAPS. We have the ability to upload PSAT, SAT, ACT, PLAN, and WorkKeys data. We have created metrics and reports for these as well. [Vendor Release Link](#)

What else is available in the Oregon Data Suite?

Essential Skills, this can include SBAC, Work Samples, WorkKeys, PSAT, ACT, PLAN, and SAT.

Custom Assessments allows you to track student work samples. We have many assessments already available and can customize assessments to meet your district needs.

Kindergarten Assessment data can be uploaded into the Oregon Data Suite.

Freshman on Track data is available in the Oregon Data Suite and can be uploaded to ODE.

National Student Clearinghouse Data is available as provided by ODE.

Reports are available that cover Attendance, Assessments, ELPA, Essential Skills, Discipline, Enrollment, DESSA, grade-level on track and much more!

Can I track students at risk?

We now offer the Early Indicator & Intervention System (EIS) that gives you the ability to set Key Performance Indicators and thresholds at a building or grade level. This allows your district to track attendance, behavior, course performance, and assessment data to help identify students that are at risk of academic failure.
